

To our patients and families,

Once again, our American Dental Association has updated their recommendations during this viral outbreak. It is now recommended that routine exams, maintenance cleanings and non-emergency procedures be suspended until April 30<sup>th</sup>. We will be available for any emergencies throughout that time. If you have questions or an emergency, please call (260) 471-1222. We will monitor calls on a daily basis.

As the end of the month approaches and we have a definite reopening date our staff will be in touch to reschedule appointments.

Our primary concern is the health and safety of both our patients and staff.

Stay safe,

Steven B. Lee, DDS
